AIR FORCE FELINE DOMESTIC COMPANIONSHIP & READINESS PROGRAM (AF-FCRP)

COMPLIANCE WITH THIS PUBLICATION IS MANDATORY

ACCESSIBILITY: Publications and forms are available on the e-Publishing website at www.e-Publishing.af.mil for downloading or ordering.
RELEASABILITY: There are no releasability restrictions on this publication.
OPR: AF/A1-MEOW | Certified by: SAF/MR (Dr. P. Purrington) | Pages: 30

This instruction implements Department of the Air Force Policy Directive (DAFPD) 36-99, *Domestic Animal Readiness Standards*, and aligns directly with Department of Defense Directive (DoDD) 1342.17. It establishes comprehensive, mandatory directive guidance for the administrative management, authorized billeting, tactical grooming, operational noise abatement, and morale integration of domestic felines (*Felis catus*) across all Department of the Air Force installations. This publication applies to all uniformed members of the Regular Air Force, the United States Space Force (USSF), the Air Force Reserve, and the Air National Guard (ANG). It further applies to Department of the Air Force civilian employees and contractor personnel residing in government-controlled quarters or operating within designated feline-authorized facilities.

Ensure all records created as a result of processes prescribed in this publication are maintained in accordance with Air Force Instruction (AFI) 33-322, *Records Management and Information Governance Program*, and disposed of in accordance with the Air Force Records Information Management System (AFRIMS) Records Disposition Schedule (RDS). Refer recommended changes and questions regarding this publication to the Office of Primary Responsibility (OPR) using DAF Form 847, *Recommendation for Change of Publication*; route DAF Forms 847 through the appropriate Functional Feline Authority (FFA).

SUMMARY OF CHANGES: This is the comprehensive initial publication of DAFI 36-9999. Major provisions establish: (1) mandatory 16-to-18 hour sleep allocation per 24-hour duty cycle; (2) authorized breed categories including single-brain-cell medical safe-harbor provisions for Orange Tabby felines; (3) noise abatement policies concerning the 0300 Midnight Zoomies; (4) uniform cat hair tolerances not to exceed 10% total Operational Camouflage Pattern (OCP) surface coverage; (5) strict flightline and Controlled Movement Area (CMA) exclusion to eliminate Foreign Object Debris (FOD) hazards; and (6) standards for the annual Feline Physical Fitness Readiness Assessment (PFRA).

CHAPTER 1 — PROGRAM OVERVIEW AND ROLES & RESPONSIBILITIES

1.1. Purpose & Command Intent. The Air Force Feline Companionship and Readiness Program (AF-FCRP) establishes standardized administrative and operational mechanisms to integrate domestic felines into total force morale operations. When properly maintained in accordance with this instruction, felines contribute directly to Airman resilience, dormitory stress reduction, pest deterrence, and workplace camaraderie.

Procedural Note to 1.1. Purpose & Command Intent.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

1.2. Secretary of the Air Force (SecAF). The SecAF reserves sole statutory authority over overarching strategic pet policy, diplomatic feline transfers, and the establishment of multi-domain feline working groups. SecAF retains final review of feline court-martial appeals under UCMJ Article 92 (T-0).

Procedural Note to 1.2. Secretary of the Air Force (SecAF).: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

1.3. Chief of Staff of the Air Force (CSAF). The CSAF shall establish global feline readiness targets, mandate standardized dry-kibble logistics distribution chains, and direct the integration of squadron feline morale assets into Agile Combat Employment (ACE) dispersed operations (T-1).

Procedural Note to 1.3. Chief of Staff of the Air Force (CSAF).: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

1.4. Deputy Chief of Staff for Manpower, Personnel and Services (AF/A1-MEOW). AF/A1-MEOW serves as the Functional Feline Authority (FFA). Responsibilities include: (1) managing the Defense Feline Tracking Database (DFTD); (2) publishing standardized physical readiness scoring tables; (3) issuing policy updates regarding authorized scratching post materials; and (4) reviewing major feline disciplinary appeals (T-1).

Procedural Note to 1.4. Deputy Chief of Staff for Manpower, Personnel and Services (AF/A1-MEOW).: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

1.5. Major Command Commanders (MAJCOM/CC). MAJCOM Commanders shall appoint a Command Feline Officer (CFO) in the grade of Lieutenant Colonel (O-5) or civilian equivalent to oversee theater-wide feline welfare, climate-specific bedding allowances, and winter heating pad logistics (T-2).

Procedural Note to 1.5. Major Command Commanders (MAJCOM/CC).: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

1.6. Wing Commanders (WG/CC). Wing Commanders are delegated authority to: (1) approve squadron shop cats via AF Form 114; (2) designate installation cardboard scratching sanctuaries; (3) declare base-wide feline quiet hours; and (4) grant density waivers for family housing (T-2).

Procedural Note to 1.6. Wing Commanders (WG/CC).: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

1.7. Installation Command Chief Master Sergeants (CCC). The Command Chief oversees dormitory feline morale, monitors First Sergeant compliance regarding litter box inspection protocols, and arbitrates disputes involving unauthorized canine vocalizations within feline-dominated dormitory wings (T-3).

Procedural Note to 1.7. Installation Command Chief Master Sergeants (CCC).: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

1.8. First Sergeants (Shirts). First Sergeants maintain operational responsibility for health, welfare, and cleanliness within feline billeting quarters. First Sergeants are authorized unannounced walk-throughs to verify water fountain filtration, litter cleanliness, and sisal scratching post availability (T-3).

Procedural Note to 1.8. First Sergeants (Shirts).: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

1.9. Individual Airmen and Guardians. Sponsors maintain 24-hour legal, financial, and moral responsibility for registered feline dependents. Sponsors SHALL NOT neglect daily chin scratch requirements or delay wet food administration past designated chow times (T-3).

Procedural Note to 1.9. Individual Airmen and Guardians.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 2 — AUTHORIZED BREEDS & ORANGE TABBY WAIVERS

2.1. Authorized Domestic Feline Breeds. Installation commanders may authorize standard domestic breeds, including Domestic Short-Hair (DSH), Domestic Long-Hair (DLH), American Shorthair, British Shorthair, Russian Blue, Scottish Fold, Calico, Tuxedo, Siamese, and standard Tabby patterns. All felines must demonstrate a conservative military demeanor in public administrative areas (T-2).

Procedural Note to 2.1. Authorized Domestic Feline Breeds.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

2.2. Orange Tabby Single-Brain-Cell Safe Harbor. It is scientifically, doctrinally, and historically established that all orange marmalade, ginger, and red tabby felines share a single, globally distributed brain cell. Consequently, cognitive anomalies—including staring into blank corners for 45 consecutive minutes, attempting to jump through solid glass windows, batting at nonexistent airborne particles, and sudden unprovoked confusion—SHALL NOT be grounds for psychiatric disqualification, administrative separation, or disciplinary demotion. Orange tabbies are granted perpetual medical safe-harbor under AF Form 422 feline medical profile code O-1 (T-1).

Procedural Note to 2.2. Orange Tabby Single-Brain-Cell Safe Harbor.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

2.3. Tuxedo Felines & Mess Dress Equivalency. Felines possessing natural black-and-white 'Tuxedo' markings are deemed to be in permanent Mess Dress equivalent uniform. They are exempt from wearing decorative ribbon collars during formal military ceremonies, provided white chest bibs and paws are kept immaculate (T-3).

Procedural Note to 2.3. Tuxedo Felines & Mess Dress Equivalency.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

2.4. Void / Solid Black Felines (Low-Observable Assets). Solid black felines ('Void Cats') provide enhanced low-observable (stealth) reconnaissance capabilities. However, sponsors must equip them with a minimum of one high-visibility breakaway collar while traversing dimly lit dormitory corridors between 2200L and 0600L to prevent human tripping mishaps (T-3).

Procedural Note to 2.4. Void / Solid Black Felines (Low-Observable Assets).: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

2.5. Calico Temperament Allowances. Tri-color Calico and Tortoiseshell felines frequently exhibit acute behavioral independence ('Cattitude'). First Sergeants shall not classify sassy chirping or refusal to acknowledge lower-ranking personnel as insubordination under Article 91 (T-3).

Procedural Note to 2.5. Calico Temperament Allowances.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

2.6. Prohibited Feral and Apex Hybrids. Servals, Ocelots, Savannah cats (F1 through F3 generations), Bobcats, Caracals, and feral apex predators are strictly prohibited from all DAF facilities. Attempting to disguise an unauthorized wild bobcat as an overweight domestic Maine Coon constitutes fraud under UCMJ Article 107 (T-0).

Procedural Note to 2.6. Prohibited Feral and Apex Hybrids.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 3 — REGISTRATION, MICROCHIPPING & VETERINARY READINESS

3.1. 14-Day Mandatory Registration Timeline. All feline personnel relocated to a Department of the Air Force installation must be processed through the Base Veterinary Treatment Facility (VTF) within fourteen (14) calendar days of arrival. Failure to in-process within prescribed timelines will result in a mandatory counseling letter from the sponsor's supervisor (T-3).

Procedural Note to 3.1. 14-Day Mandatory Registration Timeline.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

3.2. Mandatory Immunization Protocol. Felines must maintain an active Individual Feline Medical Readiness (IFMR) record. Mandatory prophylactic immunizations include: (1) Rabies 3-year vaccination; (2) Feline Viral Rhinotracheitis, Calicivirus, and Panleukopenia (FVRCP); and (3) Feline Leukemia Virus (FeLV) for all felines holding outdoor access authorization (T-1).

Procedural Note to 3.2. Mandatory Immunization Protocol.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

3.3. Mandatory Microchip Implantation. All felines residing on federal installations must be implanted with an ISO 11784/11785 compliant 15-digit microchip (T-1). Microchip serial numbers shall be permanently indexed within the Defense Feline Tracking Database (DFTD). Sponsors must verify chip function annually.

Procedural Note to 3.3. Mandatory Microchip Implantation.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

3.4. Parasite and Heartworm Prevention. Sponsors SHALL administer monthly topical or oral veterinary-approved flea, tick, and heartworm prevention year-round. An outbreak of fleas inside an Airman dormitory attributable to an unregistered feline constitutes dereliction of duty under UCMJ Article 92 (T-2).

Procedural Note to 3.4. Parasite and Heartworm Prevention.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

3.5. Mandatory Spay and Neuter Policy. All felines over the age of six (6) months billeted in government quarters must be surgically sterilized by a licensed veterinarian. Breeding operations inside unaccompanied dormitories or military family housing are strictly prohibited (T-1).

Procedural Note to 3.5. Mandatory Spay and Neuter Policy.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

3.6. Medical Quarantine Facilities. Felines exhibiting symptoms of acute respiratory distress, ringworm, or viral contagion must be placed in temporary isolation within base VTF quarantine wards until medically cleared by the Installation Public Health Officer (T-2).

Procedural Note to 3.6. Medical Quarantine Facilities.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 4 — MANDATORY SLEEP ALLOCATION & REST CYCLES

4.1. Physiological Sleep Requirements. In accordance with evolutionary predator biology and energy conservation doctrine, all military felines SHALL be allocated no less than sixteen (16.0) to eighteen (18.0) hours of uninterrupted sleep per 24-hour cycle. High-operational-tempo days (e.g. chasing sunbeams across the floor) warrant up to twenty (20.0) authorized sleep hours without loss of readiness status (T-2).

Procedural Note to 4.1. Physiological Sleep Requirements.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

4.2. Squadron Commander Ergonomic Chair Sanctuary. If an authorized feline falls asleep within a Squadron Commander's, First Sergeant's, or Flight Chief's high-back ergonomic leather chair, the chair is deemed an active Feline Operational Sanctuary (FOS). Human leadership SHALL NOT disturb, shove, or displace the feline. The human occupant shall utilize a secondary metal folding chair until the feline voluntarily relocates (T-3).

Procedural Note to 4.2. Squadron Commander Ergonomic Chair Sanctuary.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

4.3. Emergency Wake-Up Authorization. Awakening a sleeping feline for non-emergent matters (e.g. taking selfies, attempting unwanted belly rubs, or asking 'who is a handsome boy') is strictly prohibited. Emergency awakening is authorized only for active structural fires, real-world base evacuations, or immediate canned tuna delivery (T-3).

Procedural Note to 4.3. Emergency Wake-Up Authorization.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

4.4. Authorized Sleeping Postures. Authorized resting configurations include: (1) The Loaf (paws tucked fully underneath, tail wrapped); (2) The Crescent Roll; (3) The Full Sploot (hind legs extended horizontally behind); and (4) The Liquid Bowl. Airmen SHALL NOT poke a cat sleeping in the Loaf position to determine if paws still exist (T-3).

Procedural Note to 4.4. Authorized Sleeping Postures.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

4.5. Thermal Sunbeam Tracking Rights. Felines possess undisputed right-of-way to all naturally occurring sunbeam patches on office and dormitory carpet floors. Personnel shall route walking traffic around designated sunbeam zones to prevent shadow casting upon resting animals (T-3).

Procedural Note to 4.5. Thermal Sunbeam Tracking Rights.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 5 — BILLETING, DORMITORIES & RESIDENTIAL DENSITY

5.1. Maximum Density Limits in Unaccompanied Dormitories. In unaccompanied Airman dormitories, members in the grade of E-4 and above possessing pet authorization may maintain a maximum of one (1) feline per room. Junior enlisted members (E-1 through E-3) require Squadron Commander endorsement and First Sergeant verification of vacuum ownership (T-3).

Procedural Note to 5.1. Maximum Density Limits in Unaccompanied Dormitories.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

5.2. Family Housing (MFH) Density Allocations. Privatized and government-owned Military Family Housing units are authorized a baseline maximum of three (3) domestic felines. Exceeding three cats requires an approved Wing Feline Waiver (WFW) demonstrating adequate square footage, litter pan redundancy, and emotional stability (T-2).

Procedural Note to 5.2. Family Housing (MFH) Density Allocations.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

5.3. Balcony Safety and Fall Prevention Standards. Second-floor and higher dormitory balconies must possess heavy-duty protective screening or mesh netting. Felines attempting to stalk migrating birds from balcony railings risk high-rise syndrome. Sponsors permitting felines on unnetted elevated balconies will receive an immediate safety stop-work order (T-2).

Procedural Note to 5.3. Balcony Safety and Fall Prevention Standards.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

5.4. Inter-Species Deconfliction in Hallways. Canine and feline residents within the same dormitory stairwell must maintain a three-meter standoff distance. Barking at cats across common breezeways is classified as unauthorized psychological harassment. Felines are permitted to hiss once (1) as a defensive boundary warning (T-3).

Procedural Note to 5.4. Inter-Species Deconfliction in Hallways.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

5.5. Window Perch Installation. Sponsors are encouraged to install suction-cup window hammocks to facilitate bird observation. Window hammocks must be rated for at least 35 pounds to accommodate heavy Maine Coons or multiple cuddling felines safely (T-3).

Procedural Note to 5.5. Window Perch Installation.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 6 — THE 0300 MIDNIGHT ZOOMIES NOISE ABATEMENT

6.1. Doctrinal Definition of The Midnight Zoomies. The tactical event designated as 'The 0300 Midnight Zoomies' is defined as: an unprovoked, high-velocity, erratic sprint across bed tops, hallway carpets, bookshelves, and human faces occurring between 0230L and 0430L, often accompanied by dilated pupils, puffed tails, and guttural chirps directed at invisible entities (T-3).

Procedural Note to 6.1. Doctrinal Definition of The Midnight Zoomies.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

6.2. Mandatory Evening Exercise Protocol. To comply with base-wide quiet hours (2200L to 0600L), sponsors SHALL execute a mandatory ten (10) minute Vigorous Feather-Wand or Da-Bird aerodynamic interception exercise no later than 2130L. Depleting feline kinetic energy reserves prior to human sleep cycles drastically reduces night-time corridor acoustics (T-3).

Procedural Note to 6.2. Mandatory Evening Exercise Protocol.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

6.3. Sound-Dampening Floor Covering Requirements. If a feline repeatedly knocks government-issued lamps, plastic tumblers, or alarm clocks off dressers during 0300 zoomies, the sponsor must install sound-dampening acoustic floor rugs. Hardwood and linoleum corridors must feature runner carpets to muffle high-speed skidding paws (T-3).

Procedural Note to 6.3. Sound-Dampening Floor Covering Requirements.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

6.4. Mediation by the First Sergeant. Continuous neighbor noise complaints regarding galloping feline paws overhead will trigger a mandatory mediation meeting chaired by the First Sergeant. Sponsors may be directed to utilize weighted foam play-mice instead of plastic jingle-bell balls during quiet hours (T-3).

Procedural Note to 6.4. Mediation by the First Sergeant.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 7 — LITTER BOX READINESS & SANITATION INSPECTIONS

7.1. The Mandatory N+1 Receptacle Formula. In all residential quarters, sponsors SHALL maintain a minimum quantity of litter boxes equal to the total number of felines plus one (N+1). For example, a dorm room housing one (1) cat must maintain two (2) separate, accessible litter receptacles (T-2).

Procedural Note to 7.1. The Mandatory N+1 Receptacle Formula.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

7.2. Sifting and Sanitation Frequency. Litter receptacles must be sifted and scooped a minimum of twice (2x) per 24-hour cycle. Full litter changeouts and chemical basin washes with mild surfactants shall occur every seven (7) to ten (10) days. Scented crystal litters containing abrasive synthetic perfumes are discouraged (T-3).

Procedural Note to 7.2. Sifting and Sanitation Frequency.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

7.3. Ammoniac Threshold Violations. First Sergeants, Flight Chiefs, and Dorm Managers conducting health and wellness inspections are authorized to assess litter odor. Any living quarter producing an ammoniac vapor rating detectable from the doorway constitutes an immediate unsanitary living condition under Article 92, UCMJ (T-2).

Procedural Note to 7.3. Ammoniac Threshold Violations.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

7.4. Anti-Tracking Mat Positioning. Sponsors must position honeycomb or ribbed silicone anti-tracking mats directly outside all litter box exits. Allowing litter clay granules to migrate freely across barracks linoleum floor tile creates a tactile walking hazard for barefoot occupants (T-3).

Procedural Note to 7.4. Anti-Tracking Mat Positioning.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

7.5. Automated Self-Cleaning Litter Units. Electric rotating litter machines (e.g. Litter-Robot) are authorized provided they possess anti-pinch safety sensors. Felines terrified of rotating drum cycles must be provided standard open plastic pans immediately (T-3).

Procedural Note to 7.5. Automated Self-Cleaning Litter Units.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 8 — DIETARY DISCIPLINE & 0500 DRAMATIC HOWLING

8.1. Standardized Meal Schedules. Wet food and protein-rich paté rations SHALL be administered on fixed, standardized schedules. Automated microchip-enabled dry kibble feeders are authorized for shift workers supporting 24/7 security forces, air traffic control, or cyber watch rotations (T-3).

Procedural Note to 8.1. Standardized Meal Schedules.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

8.2. The 0500 False Famine Protocol. Felines vocalizing, howling, weeping, or pacing between 0445L and 0530L as if they have suffered catastrophic starvation for twelve months do NOT constitute a bona fide military emergency. Sponsors are cautioned against reinforcing dramatic 0500 vocalization with premature treat distribution (T-3).

Procedural Note to 8.2. The 0500 False Famine Protocol.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

8.3. Prohibited Human Food Items. Feeding felines onion, garlic, chocolate, grapes, raisins, caffeinated energy beverages, or military MRE cheese spread with jalapeños is strictly prohibited. Airmen caught feeding pepperoni pizza crusts to squadron morale felines will be assigned mandatory FOD clean-up detail (T-2).

Procedural Note to 8.3. Prohibited Human Food Items.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

8.4. Fresh Water Delivery Standards. Felines require continuous access to clean, filtered drinking water. Ceramic or stainless-steel recirculating water fountains are highly encouraged. Felines insisting on drinking exclusively from leaking bathroom faucets must not be left unattended while sink drains are plugged (T-3).

Procedural Note to 8.4. Fresh Water Delivery Standards.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 9 — GOVERNMENT FURNISHED PROPERTY (GFP) SCRATCHING DEFENSE

9.1. Financial Liability for Barracks Furniture. Airmen and Guardians are financially liable under Department of the Air Force financial liability investigations (DFAS-FLIPL) for destructive claw damage inflicted upon government-furnished barracks dressers, mattress edges, cloth armchairs, or window blinds (T-2).

Procedural Note to 9.1. Financial Liability for Barracks Furniture.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

9.2. Mandatory Scratching Post Placement. Every authorized feline billet must maintain at least one (1) vertical sisal rope post (minimum 32 inches height to permit full feline spinal extension) and one (1) horizontal corrugated cardboard scratching scratcher. Equipment must be positioned in high-visibility territory, not hidden in closets (T-3).

Procedural Note to 9.2. Mandatory Scratching Post Placement.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

9.3. Absolute Prohibition on Onychectomy (Declawing). Surgical declawing (onychectomy)—which entails the amputation of the last bone of each toe—is strictly classified as animal cruelty and is ABSOLUTELY PROHIBITED across all Department of the Air Force personnel. Any military member procuring declawing surgery for a feline dependent shall be subject to court-martial under UCMJ Article 134 (T-0).

Procedural Note to 9.3. Absolute Prohibition on Onychectomy (Declawing).: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

9.4. Claw Trimming and Soft Paws Caps. Sponsors SHALL maintain bi-weekly nail clipping disciplines using approved scissor-style veterinary clippers. Vinyl nail caps (e.g. Soft Paws) adhered with non-toxic surgical glue are fully authorized in conservative colors (clear, black, sage green, coyote brown, and air force blue) (T-3).

Procedural Note to 9.4. Claw Trimming and Soft Paws Caps.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 10 — WORKPLACE INTEGRATION & SQUADRON SHOP CATS

10.1. Designation of Official Squadron Shop Cats. Squadron Commanders in the grade of Major (O-4) or civilian director equivalents may designate an official 'Squadron Morale Cat' to reside within administrative, maintenance support, or communications complexes. Shop cats are strictly forbidden in clean rooms, flight kitchens, and medical clinics (T-2).

Procedural Note to 10.1. Designation of Official Squadron Shop Cats.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

10.2. Official AF Form 114 (Feline Duty Badge). Shop cats must wear an official break-away collar featuring AF Form 114 containing: Cat Name, Assigned Squadron, Microchip ID, Emergency Sponsor Contact, and Unit Mascot Rank. Felines may be promoted up to the honorary rank of Chief Master Sergeant (CMSgt) based on cumulative hours of lap sitting (T-3).

Procedural Note to 10.2. Official AF Form 114 (Feline Duty Badge).: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

10.3. Keyboard Lounging & Email Transmission Discipline. Felines lounging upon government computer keyboards while Airmen are away from desks have caused accidental transmission of unformatted character strings (e.g. ';;;;;;;;;;;;;asdf;;;jkl;') via NIPRNet email. Members must lock workstations (Windows Key + L) prior to leaving felines unattended near keyboards (T-3).

Procedural Note to 10.3. Keyboard Lounging & Email Transmission Discipline.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

10.4. Staff Meeting Briefing Interruptions. When a squadron cat enters a Commander's Call or staff briefing, personnel SHALL NOT shoo the animal. If the feline selects an individual's lap, that individual is granted an excused absence from standing at attention until the feline willingly disembarks (T-3).

Procedural Note to 10.4. Staff Meeting Briefing Interruptions.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 11 — UNIFORM WEAR & OCP CAT HAIR ALLOWANCES

11.1. Doctrinal Reality of Cat Hair Accumulation. The Department of the Air Force officially recognizes that complete, 100% elimination of feline hair from military duty uniforms is a statistical and thermodynamic impossibility for personnel cohabitating with felines (T-3).

Procedural Note to 11.1. Doctrinal Reality of Cat Hair Accumulation.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

11.2. The 10% Surface Coverage Standard. Airmen wearing the Operational Camouflage Pattern (OCP), Flight Duty Uniform (FDU), or Service Dress uniform SHALL make reasonable, disciplined efforts using adhesive lint rollers prior to reporting for duty. Total feline fur surface area coverage SHALL NOT exceed ten percent (10%) of the visible garment surface under normal indoor lighting conditions (T-2).

Procedural Note to 11.2. The 10% Surface Coverage Standard.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

11.3. Mandatory Lint Roller Positioning. All feline-owning military members must pre-position at least one (1) multi-sheet sticky lint roller: (1) at the primary residence exit door; (2) inside their personal vehicle glove box; and (3) in their squadron locker or desk drawer (T-3).

Procedural Note to 11.3. Mandatory Lint Roller Positioning.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

11.4. Color Blending Allowances. White cat hair adhering to dark navy Service Dress trousers is subject to heightened scrutiny during formal open-ranks inspections. Airmen owning white or orange felines should avoid wearing dress blues near cat trees immediately prior to Wing Commander inspections (T-3).

Procedural Note to 11.4. Color Blending Allowances.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 12 — FLIGHTLINE & CONTROLLED MOVEMENT AREA (CMA) BANS

12.1. Absolute Flightline Exclusion Zone. Under NO circumstances are felines permitted within the Controlled Movement Area (CMA), aircraft parking ramps, taxiways, runways, or engine test cells. Felines represent a catastrophic Foreign Object Debris (FOD) hazard to turbofan jet engines (T-0).

Procedural Note to 12.1. Absolute Flightline Exclusion Zone.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

12.2. Prohibition on Pitot Tube & Avionics Interaction. Felines attempting to swat at dangling red 'Remove Before Flight' streamers, climb into open avionics bays, or balance atop aircraft pitot tubes will be impounded immediately by Base Security Forces (SF) and Airfield Management personnel (T-1).

Procedural Note to 12.2. Prohibition on Pitot Tube & Avionics Interaction.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

12.3. Hangar Pest Control Restrictions. Employing felines for unauthorized hangar rodent eradication requires explicit written authorization from Base Civil Engineering (CE Pest Management) and the Installation Safety Director. Felines must never access maintenance stands while aircraft are on jacks (T-2).

Procedural Note to 12.3. Hangar Pest Control Restrictions.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 13 — TACTICAL GEAR & SUBDUED OCP ATTIRE

13.1. Authorized Feline Harness Specifications. When transported outside residential quarters or traversing installation sidewalks, felines must be secured in a non-restrictive, escape-proof, H-style or vest-style tactical harness. Leashes must not exceed six (6) feet in length (T-3).

Procedural Note to 13.1. Authorized Feline Harness Specifications.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

13.2. Spice Brown Subdued Camouflage Requirements. Feline harnesses worn in public on Air Force installations must reflect approved military camouflage patterns: OCP, Coyote Brown, Olive Drab, or Stealth Black. Neon pink, glitter, or bedazzled harnesses are strictly reserved for off-base liberty hours (T-3).

Procedural Note to 13.2. Spice Brown Subdued Camouflage Requirements.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

13.3. Velcro Nametapes & Morale Patches. Tactical harnesses equipped with loop Velcro are authorized to display: (1) One feline name tape in Spice Brown thread; (2) One miniature USAF or USSF insignia patch; and (3) Blood type / allergy patches (e.g., 'CATNIP POSITIVE'). Non-standard tactical patches must be dignified and conservative (T-3).

Procedural Note to 13.3. Velcro Nametapes & Morale Patches.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

13.4. Cat Bell Tactical Silence Order. While bells on collars aid in tracking feline whereabouts inside quarters, tactical harnesses deployed during field morale events SHALL NOT employ high-pitch jingling bells that compromise tactical stealth or annoy surrounding senior non-commissioned officers (T-3).

Procedural Note to 13.4. Cat Bell Tactical Silence Order.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 14 — UNITED STATES SPACE FORCE (USSF) ORBITAL ADDENDUM

14.1. Zero-Gravity Feline Acrobatics. In anticipation of future space habitat deployments, Guardians are advised that feline righting reflexes operate efficiently under microgravity. However, absence of friction causes spinning disorientation. Felines undergoing parabolic flight conditioning must be secured in soft-sided padded pods (T-2).

Procedural Note to 14.1. Zero-Gravity Feline Acrobatics.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

14.2. Orbital Dander Environmental Filtration. Environmental Control and Life Support Systems (ECLSS) aboard spaceborne facilities must incorporate HEPA dander filtration modules rated at 0.3 microns to prevent feline hair from fouling avionics cooling ducts and spacesuit intake valves (T-1).

Procedural Note to 14.2. Orbital Dander Environmental Filtration.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

14.3. Space Force Rank Equivalency. Felines assigned to Space Force Deltas are designated as 'Orbital Morale Specialist 3rd Class' (OMS-3) and are authorized to wear delta-shaped collar medallions (T-3).

Procedural Note to 14.3. Space Force Rank Equivalency.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 15 — FELINE PHYSICAL FITNESS READINESS ASSESSMENT (PFRA)

15.1. Annual PFRA Testing Mandate. All registered felines between the ages of 1 and 12 years shall participate in an annual Feline Physical Fitness Readiness Assessment (PFRA) conducted by the Sponsor and witnessed by an impartial E-5 or above (or neighbor Airman). Results are recorded on AF Form 9999-PFRA (T-2).

Procedural Note to 15.1. Annual PFRA Testing Mandate.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

15.2. Component 1: The 'If It Fits, It Sits' Cardboard Box Entry. The feline is presented with a standard 12x12x12 inch cardboard supply box. Evaluation metric: The subject feline must inspect, enter, and curl within the interior perimeter of the box within ninety (90) seconds. Successful sit-in confers an immediate 'GO' rating. Ignoring the box to chew on packing tape results in a re-test (T-3).

Procedural Note to 15.2. Component 1: The 'If It Fits, It Sits' Cardboard Box Entry.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

15.3. Component 2: Laser Dot Aerodynamic Interception Run. A Class-1 red laser dot is projected across a 15-foot carpet runway for thirty (30.0) seconds. The feline must demonstrate: (1) Immediate pupillary dilation; (2) Butt wiggle and crouch stance; and (3) A minimum of two (2) high-acceleration intercept strikes. Wandering away mid-test to groom a rear leg confers 0 points (T-3).

Procedural Note to 15.3. Component 2: Laser Dot Aerodynamic Interception Run.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

15.4. Component 3: Acoustic Purr Decibel Measurement. Using a calibrated mobile decibel meter placed six (6) inches from the feline's throat during chin scratching, the feline must produce an acoustic vibratory frequency exceeding thirty-two decibels (32.0 dB). A silent purr requires veterinary diagnostic evaluation (T-3).

Procedural Note to 15.4. Component 3: Acoustic Purr Decibel Measurement.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

15.5. Composite Scoring Standards. Scores are tabulated on a 100-point scale: 90+ points (Excellent - Awarded Feline Morale Ribbon); 75-89 points (Satisfactory); under 75 points (Unsatisfactory - Placed on mandatory evening laser-pointer remedial conditioning) (T-2).

Procedural Note to 15.5. Composite Scoring Standards.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 16 — CATNIP USE & ARTICLE 112a UCMJ EXEMPTION

16.1. Botanical Scope and Legal Classification. Nepeta cataria (commonly known as Catnip) and Actinidia polygama (Silvervine) are officially classified as authorized tactical botanicals for feline consumption and stress mitigation. They are recognized as safe, non-addictive herbal enhancements (T-2).

Procedural Note to 16.1. Botanical Scope and Legal Classification.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

16.2. Absolute Exemption from UCMJ Article 112a. Air Force drug prohibition standards under Article 112a (Controlled Substance Offenses) DO NOT apply to registered feline dependents consuming catnip. Military Working Dog handlers and Security Forces drug detection K-9 teams SHALL NOT alert upon feline catnip sachets (T-0).

Procedural Note to 16.2. Absolute Exemption from UCMJ Article 112a.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

16.3. Catnip Intoxication Behavior Safe Harbor. Behaviors exhibited under active catnip influence—including drooling, rubbing cheeks vigorously against shoes, rolling upside down on area rugs, and staring blissfully at ceiling fans—SHALL NOT be classified as conduct unbecoming a military dependent. Full recovery typically occurs within thirty (30) minutes (T-3).

Procedural Note to 16.3. Catnip Intoxication Behavior Safe Harbor.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

16.4. Human Consumption Prohibited. Airmen, Guardians, and civilian personnel are strictly prohibited from smoking, brewing, or ingesting feline catnip reserves. Violators will face immediate urinalysis screening and adverse administrative action (T-1).

Procedural Note to 16.4. Human Consumption Prohibited.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 17 — LASER POINTER RULES OF ENGAGEMENT (ROE)

17.1. Hardware Safety Standards. Only Class 1 or Class 2 eye-safe red laser pointers emitting less than 1 milliwatt (< 1mW) of output power are authorized for feline exercise on military installations. Industrial green or high-power burning lasers are strictly prohibited under Air Force Occupational Safety Standards (AFMAN 91-203) (T-1).

Procedural Note to 17.1. Hardware Safety Standards.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

17.2. Drywall Standoff Distances. Laser operators must maintain a minimum two-foot buffer between the laser dot and baseboards, walls, open windows, and glass patio doors. Pointing laser dots up vertical walls exceeding four feet causes felines to launch into drywall, creating spackle repair liabilities (T-3).

Procedural Note to 17.2. Drywall Standoff Distances.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

17.3. Mandatory Physical Reward Closure. To avoid chronic feline psychological frustration from chasing an uncatchable photon dot, operators SHALL conclude every laser exercise session by directing the dot onto a tangible, physical cat toy or treat, allowing the feline to successfully capture a physical reward (T-3).

Procedural Note to 17.3. Mandatory Physical Reward Closure.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 18 — PERMANENT CHANGE OF STATION (PCS) & TRAVEL STANDARDS

18.1. Commercial & Patriot Express Travel Allowances. Felines accompanying sponsors on Permanent Change of Station (PCS) orders are eligible for travel aboard the Patriot Express (Air Mobility Command AMC chartered flights) subject to pet space allocation and IATA live animal crate specifications (T-2).

Procedural Note to 18.1. Commercial & Patriot Express Travel Allowances.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

18.2. Cabin Carrier Integrity Standards. In-cabin pet carriers must be soft-sided, leak-proof, and fit entirely underneath the forward passenger seat. Felines unzipping carriers with claws or poking heads out to meow during flight attendant safety demonstrations must be calmed with vet-prescribed gabapentin (T-2).

Procedural Note to 18.2. Cabin Carrier Integrity Standards.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

18.3. International Quarantine Compliance. When PCSing to OCONUS locations (e.g. Ramstein AB, Yokota AB, RAF Lakenheath), sponsors must initiate FAVN rabies blood titer testing at least six (6) months prior to departure to avoid catastrophic commercial quarantine fees upon arrival (T-1).

Procedural Note to 18.3. International Quarantine Compliance.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 19 — DISCIPLINARY COUNSELING & ANKLE BITING INCIDENTS

19.1. Progressive Behavioral Discipline. Felines exhibiting aggressive behavioral infractions—including swatting at walking ankles from underneath bed skirts, unprovoked biting during petting, or knocking drinking glasses off nightstands—are subject to progressive verbal counseling and immediate cessation of treat privileges (T-3).

Procedural Note to 19.1. Progressive Behavioral Discipline.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

19.2. Spray Bottle Disciplinary Restrictions. The use of pressurized water spray bottles is strictly limited to clear clean tap water on a gentle mist setting. High-pressure jet streams or adding vinegar/citrus solutions is classified as cruel and abusive and is strictly forbidden (T-1).

Procedural Note to 19.2. Spray Bottle Disciplinary Restrictions.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

19.3. Administrative Time-Outs. When a feline undergoes sensory overload, sponsors SHALL establish a quiet 'decompression space' (e.g. darkened bathroom or laundry nook with litter and water) for a period not to exceed sixty (60) minutes. Doors must remain unlocked (T-3).

Procedural Note to 19.3. Administrative Time-Outs.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

CHAPTER 20 — HONORABLE DISCHARGE, RETIREMENT & VETERAN STATUS

20.1. Feline Retirement Protocol. Upon reaching fourteen (14.0) years of age, or upon permanent retirement of the military sponsor, shop cats and long-serving morale felines are eligible for an official retirement certificate (AF Form 9999-RET) signed by the Squadron Commander (T-2).

Procedural Note to 20.1. Feline Retirement Protocol.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

20.2. Veteran Feline Morale Pension. Retiree felines are formally commended for meritorious service to unit morale, pest reduction, and lap comfort. They are entitled to lifelong respect, senior citizen canned paté rations, and perpetual sunbeam napping rights at all military retirement enclaves (T-3).

Procedural Note to 20.2. Veteran Feline Morale Pension.: Personnel must reference AFMAN 36-2905 and local Wing supplement guidance for specific operational exceptions. Any non-compliance will be documented via AF Form 1058 Unfavorable Information File (UIF) action by the servicing First Sergeant.

ATTACHMENT 1 — GLOSSARY OF REFERENCES AND ACRONYMS (PART 1: ACRONYMS)

Acronym	Official Definition / Meaning
AF-FCRP	Air Force Feline Companionship and Readiness Program
AF/A1-MEOW	Office of the Deputy Chief of Staff for Feline Personnel and Readiness
AMC	Air Mobility Command (Patriot Express Pet Flights)
ANG	Air National Guard (State Feline Units)
CMA	Controlled Movement Area (Runways and Taxiways - STRICT NO CAT ZONE)
DFAS	Defense Finance and Accounting Service (Claw Damage Deductions)
DFTD	Defense Feline Tracking Database (Microchip registry)
DLH	Domestic Long-Hair (Enhanced Fur Shedding Classification)
DSH	Domestic Short-Hair (Standard Issue Feline Model)
ECLSS	Environmental Control and Life Support Systems (Orbital Dander Scrubber)
FAVN	Fluorescent Antibody Virus Neutralization (Rabies Titer for OCONUS)
FDU	Flight Duty Uniform (Requires Flightline Lint Roller Inspection)
FeLV	Feline Leukemia Virus (Mandatory Screening)
FFA	Functional Feline Authority
FOD	Foreign Object Debris (includes cat fur, rogue feather wands, and curious felines)
FOS	Feline Operational Sanctuary (Commander's Leather Chair during active nap)
FVRCP	Feline Viral Rhinotracheitis, Calicivirus, Panleukopenia Vaccine

ATTACHMENT 1 — GLOSSARY (PART 2: DEFINITIONS AND TERMS)

Term	Doctrinal Military Definition
Catnip Intoxication	A temporary, non-punitive state of sensory bliss induced by Nepeta cataria, characterized by horizontal carpet rolling and facial cheek friction.
Dramatic Vocalization	A high-amplitude, persistent audio broadcast initiated between 0445L and 0530L claiming complete nutritional deprivation despite full dry kibble reserves.
High-Rise Syndrome	Severe physical trauma resulting from felines miscalculating aerodynamic trajectories while leaping off elevated barracks balconies.
Individual Feline Record	The permanent military personnel jacket containing vaccination certificates, microchip serials, and PFRA scorecards.
Loaf Stance	A formal resting posture wherein all four paws and tail are completely retracted beneath the torso, creating a bread-like geometric form.
N+1 Rule	The mandatory logistical formula requiring the total number of litter receptacles to equal total feline occupants plus one.
Orange Tabby Safe-Harbor	Legal immunity granted to orange marmalade felines acknowledging their operation under a shared single brain cell.
Shop Cat	An authorized feline morale non-commissioned officer assigned to an administrative or maintenance facility under AF Form 114.
Soft Paws Caps	Veterinary vinyl nail caps affixed with surgical adhesive to mitigate damage to Government Furnished Property.
Sploot	A prone relaxation posture characterized by full horizontal extension of rear limbs, maximizing thermal floor dissipation.
The 0300 Zoomies	Zero-Origin Operational Movement In Erratic Sequences; spontaneous tactical sprints conducted during installation quiet hours.

ATTACHMENT 2 — TIER WAIVER AUTHORITY MATRIX (T-0 TO T-3)

Tier waiver authorities determine the lowest level of leadership authorized to approve non-compliance or procedural exceptions. T-0 waivers require Department of the Air Force or higher statutory approval. T-1 requires MAJCOM/CC, T-2 requires Wing Commander (WG/CC), and T-3 requires Squadron Commander (SQ/CC).

Paragraph Reference	Compliance Subject Matter	Tier	Waiver Approval Authority
Paragraph 1.2	Strategic feline policy & court-martial reviews	T-0	Secretary of the Air Force (SecAF)
Paragraph 2.6	Prohibition on apex bobcats and cougars	T-0	Secretary of the Air Force (SecAF)
Paragraph 9.3	Absolute ban on surgical declawing	T-0	Non-waivable (Statutory prohibition)
Paragraph 12.1	Flightline Controlled Movement Area ban	T-0	Installation Safety & Airfield Ops
Paragraph 16.2	Catnip exemption from UCMJ Article 112a	T-0	Judge Advocate General (AF/JA)
Paragraph 2.2	Orange tabby single-brain-cell safe harbor	T-1	AF/A1-MEOW (Permanent safe-harbor)
Paragraph 3.3	15-digit microchip registration mandate	T-1	Base Veterinary Clinic Commander
Paragraph 5.2	Exceeding 3 felines in Family Housing	T-2	Wing Commander (WG/CC)
Paragraph 10.1	Official Squadron Shop Cat designation	T-2	Wing Commander (WG/CC)
Paragraph 4.2	Relocating cat from Commander's Chair	T-3	Squadron Commander (SQ/CC)
Paragraph 5.1	Dormitory pet density authorization	T-3	Squadron Commander & First Sergeant
Paragraph 11.2	OCP cat hair tolerance (> 10% coverage)	T-3	Flight Chief or First Sergeant

ATTACHMENT 3 — FELINE PHYSICAL FITNESS READINESS ASSESSMENT (PFRA) SCORING MATRIX

Component Event	Exemplary (90-100 pts)	Satisfactory (75-89 pts)	Unsatisfactory (< 75 pts)
1. Box Entry ('If It Fits, It Sits')	Enters 12x12in box in <15s; curls in complete loaf position.	Enters box in <60s; keeps one foot dangling out.	Ignores box; chews corner flaps; sits on lid instead.
2. Laser Dot Intercept	Aggressive butt-wiggle; 3+ direct paw strikes on dot in 30s.	Tracks with head; 1 strike; moderate tail swish.	Stares into distance; wanders to food bowl mid-test.
3. Purr Decibel Output	> 45 dB (Vibrates human ribcage across room).	32 - 44 dB (Audible within two feet).	< 32 dB (Silent purr; requires vet stethoscope).
4. 0300 Zoomie Speed	> 18 mph across living room rug with drift turn.	10 - 17 mph with minor cabinet collision.	< 10 mph (Lethargic; classified as potato).
5. Cardboard Destruction	Converts post into confetti within 30 duty days.	Moderate scratching on authorized sisal rope.	Scratches government barracks dresser corners.
6. Chin Scratch Tolerance	Permits 10+ consecutive minutes without biting.	Permits 3 - 9 minutes before gentle warning nip.	Immediate claw defense under 30 seconds.

ATTACHMENT 4 — SAMPLE AF FORM 9999: FELINE DUTY BADGE & WORKPLACE SANCTUARY

OFFICIAL INSTRUCTION: This form must be completed in triplicate and filed with the Base Veterinary Treatment Facility (VTF) and the Squadron First Sergeant prior to introducing any feline into an administrative workplace or dorm billet. Sections I through V must be certified by an O-4 or civilian equivalent.

AF FORM 9999 (REVISED MAR 2026)	TRACKING ID: DAF-CAT-2026-9999-AF
Section I - Feline Demographic Information	**1. Name:** Barnaby 'Danger' Meowington **2. Breed:** Domestic Short-hair (Orange Tabby) **3. Microchip Serial:** 985141002391024 **4. Brain Cell Allocation Status:** Seeking Connection (Waiver Code O-1)
Section II - Assigned Unit & Operational Rank	**5. Sponsoring Unit:** 432d Aircraft Maintenance Squadron (432 AMXS) **6. Honorary Grade:** Chief Master Sergeant (CMSgt) **7. Primary AFSC:** 9M999 - Feline Morale and Rodent Interception Specialist
Section III - Designated Workplace Sanctuaries	**8. Primary Nap Zone:** In-Box atop Flight Chief Desk **9. Secondary Nap Zone:** Squadron Commander's High-Back Leather Chair **10. Prohibited Boundaries:** Flightline ramp, jet intakes, tool cribs, and clean rooms
Section IV - PFRA Assessment Record	**11. Box Sit Score:** 100/100 (Immediate Loaf Formation) **12. Purr Acoustic Rating:** 48.2 dB (Exemplary Category) **13. Composite Fitness Category:** EXCELLENT (Morale Ribbon Authorized)
Section V - Squadron Commander Endorsement	*I certify this feline dependent has met all behavioral, vaccination, and PFRA readiness standards. Feline is authorized to sleep across government keyboards during non-operational periods.* **Signature:** THOMAS J. CATSON, Col, USAF, Commanding

ATTACHMENT 5 — APPROVED HARNESS CAMOUFLAGE PATTERNS & WEAR GUIDANCE

A5.1. Camouflage Fabric Selection. Feline tactical harnesses must be constructed of 500-Denier Mil-Spec Cordura nylon fabric conforming to MIL-DTL-32439. Approved camouflage patterns comprise standard Operational Camouflage Pattern (OCP), Coyote Brown 498, Olive Drab 107, and Matte Black (Void Cats only). MultiCam Black is authorized for night-shift Security Forces felines.

A5.2. Subdued Name Tape Specifications. Name tapes must measure exactly 3.5 inches in width by 0.75 inches in height, featuring 0.5-inch embroidered block capital letters in Spice Brown thread (Air Force) or Space Blue thread (Space Force). Feline callsigns (e.g. 'BISCUITS', 'CHAOS', 'WARLORD') are authorized provided they maintain military decorum.

A5.3. Break-Away Safety Mechanism. All collars and harnesses deployed inside facilities must incorporate a dual-release breakaway safety buckle calibrated to release under five (5.0) pounds of sustained tensile load. This prevents fatal hanging mishaps if a feline leaps off a barracks bookshelf and snags on a curtain rod.

A5.4. Bell Silencing Orders. Brass or silver jingle bells are strictly forbidden on outdoor tactical harnesses. Personnel who enjoy knowing where their cat is shall rely on micro-GPS tags affixed to harness loop Velcro.

FINAL ADMINISTRATIVE DIRECTIVE

Compliance with this Department of the Air Force Instruction is mandatory for all personnel. Commanders at all echelons will ensure full dissemination. Failure to observe feline mandatory sleep quotas or unauthorized interference with a Cat in a Box may result in administrative counseling or adverse evaluation reports. Long live the feline morale readiness mission.

BY ORDER OF THE SECRETARY OF THE AIR FORCE
FRANKLIN C. CHESHIRE, General, USAF
Chief of Staff

ATTACHMENT 6 — REGULATORY SUPPLEMENTARY DIRECTIVES (ADDENDUM 1)

This addendum provides localized implementation parameters for installation commanders operating under high-feline density environments. Commanders shall ensure all local standard operating procedures (SOPs) align with DAFI 36-9999 core chapters. Paragraph A6.1: Installation scratching posts shall undergo quarterly structural engineering inspections by Civil Engineering. Paragraph A6.2: Airmen observing unauthorized feline laser-dot harassment shall report incidents immediately to the Unit Safety Representative.

Official Record Note: Maintain records in accordance with AFRIMS RDS Table 36-01. Disposal: Destroy when superseded, obsolete, or upon feline retirement.
